

Testimonials

*Texas Department Of Transportation - Amarillo District Office
Chris Chambers - Landscape Architect
Amarillo, TX*

“DRiWATER® does exactly what it was meant to do. It delivers water during the establishment period. DRiWATER® makes plantings possible that would normally have to be truck watered. DRiWATER® is great for any replant situation. Once placed next to the plant you can be sure that your plants are receiving the moisture they need.”

*Northwestern Resources
Phil Letbetter - Reclamation Specialist
Jewett, TX*

“I believe that 95% of our trees were saved by using DRiWATER® and that none would have survived had we not applied DRiWATER® during these extreme drought years.”

*Walsh Vineyard Management
Brian Shepard - Vice President & General Manager
Sonoma, CA*

“After using DRiWATER® on our replants for a couple of years we found ourselves in a bind with thirty-three thousand vines having to go in the ground without adequate irrigation. With confidence we decided to use DRiWATER®. After the superior growth rates on such a high volume planting we have decided to budget DRiWATER® in for all our replants each year.”

*New Mexico Energy, Minerals & Natural Resources Department
John A. Kretzmann - P.E., Environmental Engineer,
Abandoned Mine Land Bureau
Santa Fe, NM*

“I am happy with the results of using DRiWATER® and will be specifying it in our next two projects, the Madrid gob reclamation project and the Cochiti Mine safeguard project.”

*Metamorphosis Erosion Control, Inc.
David Franklin , Vice President – CPESC
Napa, CA*

Metamorphosis has used DRiWATER® for about 5 years with great results. One example is the Redwood Estates project in Santa Cruz. This roadside repair and revegetation took longer than expected. In order to complete the project and close it out, Metamorphosis requested a change order to allow the use of DRiWATER® on the native plants after installation. This was around May and when we came back 3 months later to add a recharge of DRiWATER®, over 95% of the plantings had survived. We thought some of the mortality was due to pestilence and not a lack of water. The recharge application got the plants through to Fall rains and they were on their own after that. We have recommended and used DRiWATER® a number of times since then with similar results.

Molycorp, Inc.
Ann Wagner - Environmental Coordinator
Questa, NM

“Pleasantly surprised!” She reported finding a “...98% success rate on the one-gallon Ponderosa Pines planted with DRiWATER® as opposed to 83% on those without DRiWATER®.” With the Blue Spruce transplanted from D 40 containers she found an even more significant difference. “The spruce planted with DRiWATER® had a 98% success while those planted without DRiWATER® rated at 71%.”

Walnut Creek Mining Company
Roger Burton - Mine Manager
Bremond, TX

“DRiWATER® has helped our reclamation trees survive one of the hottest and driest years in Texas history.”

City of Santa Rosa
Dan Neff - Parks Superintendent
Santa Rosa, CA

“We use DRiWATER® in areas where irrigation is not available or where conventional irrigation would compromise the integrity of a slope.”

Rancho Properties
John Neeb - Owner
Mission Viejo, CA

“We would like to thank you for introducing your product to us. We are currently using DRiWATER® on projects in San Clemente and San Diego. We are very pleased with the outcome. The plants we have used with DRiWATER® are healthy and growing vigorously. Using DRiWATER® also helps avoid erosion problems. We will be calling you again for our next project.”

Mayacamas Vineyards
Bob Travers - Owner
Napa, CA

“Watering scattered replacement vines is no longer a problem since we started using DRiWATER®. When asked how our water is these days we say, “the same as our wine, very dry.”

Former California Governor
Gray Davis

“I am very pleased that DRiWATER® will be able to bring its important environmental technology to water-starved regions. California continues to be a leader in environmental technology, and DriWater, Inc., is bringing the right solutions at the right time to the region. The problem of water scarcity has plagued the Middle East for centuries. I am glad that a California company is having a profound impact on providing jobs, and contributing a cooperative, peaceful, and practical technology to an age-old problem.”
